🪪 Profile

A results-driven developer with a foundational background in Business Administration from Helwan University. His academic journey sparked a deep interest in technology, which he channeled into a passion for web development. He has since diligently refined his full-stack skills to build high-quality, efficient, and user-centric web applications.

📁 Projects

Job Board Platform   05/2025 – 06/2025
"Full-featured job board platform with employer, candidate, and admin modules (Laravel + Tailwind)"

- **Employers:** Register, post and manage detailed job listings, review applications, comment on listings, and access basic analytics.
- **Candidates:** Create profiles, search and filter jobs (keywords, location, category, salary, experience, etc.), apply with resumes/contact info, and track applications.
- **Admins:** Approve/reject postings, monitor user activity, and manage inappropriate content or comments.

Cafeteria Management System   04/2025 – 05/2025
"Complete web-based system to streamline user and admin operations"

- **User Features:** Place orders via a user-friendly interface, view order history, cancel pending orders.
- **Admin Features:** Manage products (add/update/delete), place orders on behalf of users, monitor users and their orders.
- **Tech Stack:** HTML & CSS (responsive UI), JavaScript (dynamic interactions), PHP (backend & database).

Movie App   03/2025 – 04/2025
"Angular | The MovieDB API"

- Browse movies and TV shows with detailed information.
- Add movies to a personal **favorites (wishlist)** list.
- Search functionality with paginated results for smoother browsing.
- View reviews and explore dedicated pages for movies, details, wishlist, search, and TV shows.
